

PROFILE

Conscientious, innovative and driven professional with a mission to not be an 'individual contributor', but a key individual who succeeds in maximizing the contributions and success of the entire team. Strong attention to detail. Ability to multitask and bring multiple, complex projects to completion simultaneously. Focused on building user-friendly, standards-based, and visually engaging, web sites from concept to testing. Passionate about developing web-apps that impact and empower users. Always excited about cutting edge technology developments, and constantly striving to expand my capabilities.

SKILLS

Web Development

Experienced with creating robust SPA web applications (AngularJS and EmberJS). Front-end web development with semantic HTML5, CSS3, and JavaScript.

System Administration

Skillful with Linux based servers (Debian and Ubuntu). Knowledgeable in the configuration and tweaking of Apache, Nginx, PHP-FPM, HAProxy, MySQL, and PostgreSQL.

UI Design

Photoshop wire framing and site planning. Translating design comps and wireframes into HTML5 and CSS3 layouts. Focused on creating accessible cross-browser design patterns compatible with mobile devices.

EDU

The Tech Academy Portland

Full Stack Programming Course

August 2015-Present

The course is designed to teach full stack web development identifying iterative and agile development (Scrum) strategies. Extensive training in both front-end and back-end web technologies including C#, ASP.NET, PHP, Python, and extensive JavaScript training (Ember.js, jQuery, and NodeJS). The course also accentuated programming best practices, test driven development, code quality, REST api architecture, data encapsulation, closures, binding, inheritance, and name spacing.

WORK

Web-Developer

Freelance Web Developer

July 2013-Present

Full-stack JavaScript development utilizing semantic HTML5, CSS3, Bootstrap, AngularJS, EmberJS, Jasmine and REST api architecture while adhering to the latest web UI standards, design patterns, and best practices. Adept at transforming PSD (Photoshop) design comps and wireframes into HTML5 and CSS3 layouts. Utilizing Compass, Sass, jQuery, agile development, continuous deployment, and test driven development to guarantee productivity and simplify workflow. Implementation of advanced JavaScript functionality with front end frameworks to assemble highly-scalable, modular, and well-documented code; deploying responsive 'mobile first' web-apps; and pixel perfect user-friendly website interfaces.

Prosper IT Consulting

Front End Developer

August 2015-Present

Front end development of an ASP.NET MVC learning portal for proprietary technical software development course. App was fully hosted in the Azure cloud, and used ASP.NET Identity, OAuth, and SQL Server.

Now Nerd

Front End Developer

March 2015-August 2015

Front end web/app development utilizing the latest web technologies in a SaaS, SPA, or cloud-based product environment to improve user work flows and simplify, user interactions for web- based apps. Building applications with extensive admin functionality and backend integration via an api. Implementing data visualization frameworks for metrics and reporting for the user dashboard of an application.
